

THE MAD HOUSE STUDIO

WELCOME

Madhouse Studio is a standing set built inside a movie studio in Madrid, Spain.

The set recreates an urban dwelling with an European flavor. It features the atmospheric quality of a natural location and the complete flexibility of a movie set.

All rooms are multi-purpose and adaptable to the requirements of any audiovisual production. The set has been designed down to the last detail in order to facilitate work and cater for your project's needs, as well as saving production costs.

We wish to return to the origins of filmmaking and bring back the versatility of working in a well-thought-out movie set.

MI CASA ES SU CASA

The Madhouse set features seven main areas.

A spacious living room, dining room and kitchen that may be joined in an open-concept plan or kept as independent rooms.

A main bedroom with an adjoining dressing room and bathroom. The walls of the main bedroom can be moved to build a different layout and the dressing room partition may be removed.

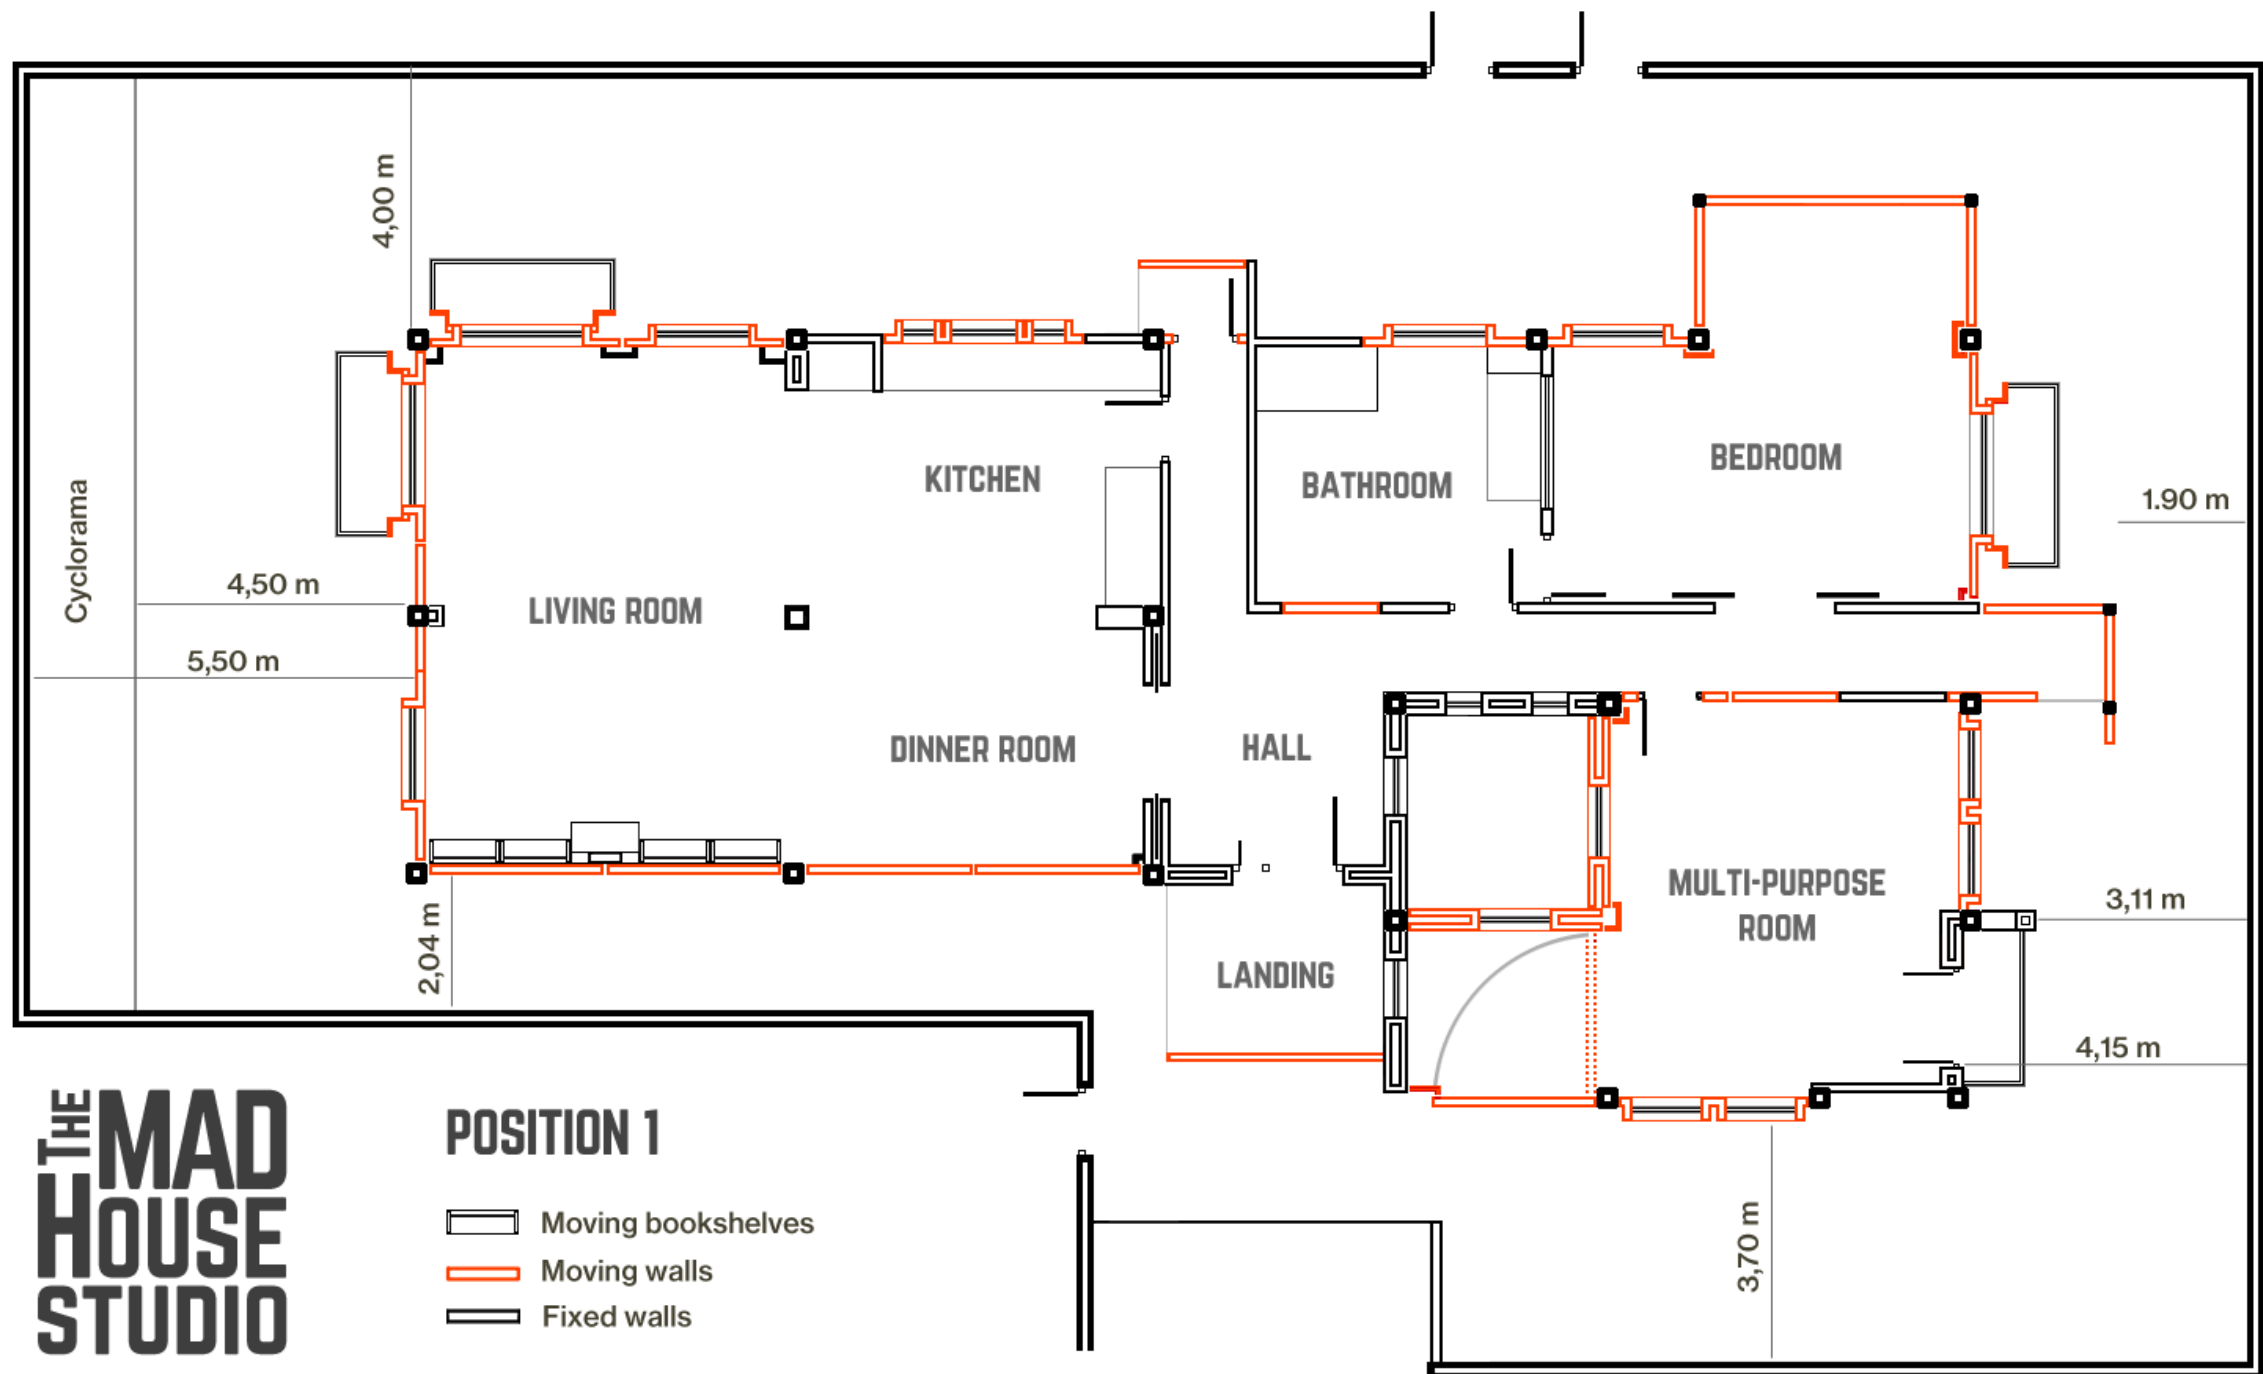

A supplementary all-purpose room that may be dressed to become an office, a study, a waiting room or another bedroom, to cite a few examples.

Common areas: Landing, entrance hall and two different hallways, with windows opening into an inner patio.

Many of the walls can be moved to allow for a wide variety of camera angles.

Windows and balconies are interchangeable so that you can get the desired ambiance for the room.

AND THERE'S MORE...

Additional facilities include a make-up and wardrobe room, a production office, a V.I.P. dressing room and a waiting room. Oh, and there's free wi-fi.

The studio's electrical installation contemplates the connection of professional lighting equipment.

Built inside a movie studio, there's total control over light conditions and the possibility of making shots that would be impracticable in a real location, such as a top-down shot.

AND THERE'S MORE...

Madhouse is located on a private street with ample parking space that can be reserved for production vehicles and lorries.

Optionally, if the production requires it, there are two empty studios adjacent to the Madhouse set that can be rented separately.

We have agreements with lighting and construction crews so that we can offer —also in a discretionary manner— additional services related to an audiovisual production at a good price.
