2011-2018

After finishing my TV & AUDIOVISUAL REALIZATION degree in Barcelona in 2015 I have been working and film experimenting almost everywhere and anytime I could. I was lucky to be able to get in touch with some big production companies that work internationally for many different costumers such as [TWENTYFOUR-SEVEN.TV](#), and [SAUVAGE.TV](#). Practicing and getting to know all about different fields such as PA, 2AD, Location assistant... and to learn from good directors and crews.

I had as well the motivation and opportunity to do some stuff by myself, getting to know and practice filming and editing skills that keep on developing everyday. I get inspired by nature and its own art. I get inspired by different trips done around the world that get you to see life from a different perspective. India, Thailand, Spain, Israel and Egypt are some of the places that became part of my path and I only want to know more to enhance my knowledge and point of view.

So currently I am still traveling and looking for new projects and moments to catch and film. I believe Always looking forward to find a place where I can develop and contribute in creation, imagination and ideas.

Those are some examples of projects I've been collaborating in and some personal others.
